Thus far, I have found many files pertaining to ASTM meetings but nothing to specific SAP meetings pertaining to rodents or rodenticides. There might have been some SAP meetings in the late '70's or early '80's regarding rodenticidal uses of 1080 and/or Strychnine. I didn't attend any meetings. I'm sure that there was at least one SAP meeting associated with the Product Performance Guidelines for Vertebrate Pesticides, but I have not found any records of such a meeting.
